Date: April 14, 2022

Dear Parent,

Nestling gratification in our heart and gratitude in our mind, we'd like to share with you all that the **school is commemorating the milestones achieved in last 9 years since its inception and celebrating the Earth Day on 22nd April, 2022.**

We are thrilled to inform you that on this day the **Sustainability and Eco Club** of the school in association with Arcedtech, is taking the baton and continuing with the efforts of **saving birds and saving trees** through the following activities:

- 1) The esteemed and unparalleled **Mr. Rakesh Khatri- “The Nest Man of India”** would be visiting our school and teaching our environment-conscious students to make nests and contribute in saving the depleting bird population. He will also address the students with his phenomenal insights and the need to save birds.
- 2) We are also organizing a **“Waste Paper Drive”** in which each Dipsite will contribute newspapers/ waste papers from their homes. The accumulated material will be recycled to create notebooks and pencils. These will be distributed to the underprivileged children who are deprived of these basic essentials.

Let's all come together in this benevolent drive and do our bit for the birds who need us and for the nature that nurtures us.

A meaningful contribution of waste paper and old newspapers from your end will make a huge difference. **All students must submit their contributions to their respective class teacher on April 18th, 2022. The number of newspapers to be submitted at each class level will be indicated through a broadcast message by the class teacher.** Let's do it together!

Principal
